CONTENTS—VOLUME 3

Number 1 1983/1984

nouncement ii

Sonic Well Log of the Basement Complex of the Walvis Ridge 1
D. Rabinowitz and P. E. Borella

cretion and Tectono-Sedimentary Progradation: The Taranto Gulf (Southern Italy) 9
Mascle and J. Mascle

bmarine Debris Flow Deposits Detected by Long Range Side-Scan Sonar 1000 km from Source 13
W. Simm and R. B. Kidd

Flood-Dominated Mesotidal Inlet 17
M. FitzGerald, L. K. Fink, Jr., and J. M. Lincoln

ntification of Ice-Rafted and Other Exotic Material in Deep Sea Dredge Hauls 23
J. Huggett and R. B. Kidd

ep Western Boundary Undercurrent Delineated by Sediment Texture at Base of North American Continental
e 31
L. Bulfinch and M. T. Ledbetter

riable Depositional Rates on the Slope and Rise Off the Mid-Atlantic States 37
Nelsen and D. J. Stanley

tial Grain Motion Under Oscillatory Flow: A Comparison of Some Threshold Criteria 43
K. Rigler and M. B. Collins

Method for Evaluating Statistical Errors Associated with Logarithmic Velocity Profiles 49
H. Wilkinson

Number 2–4 1983/1984

blems in Turbidite Research: A Need for COMFAN 53
lliam R. Normark, Emiliano Mutti, Arnold H. Bouma

dimentary, Tectonic, and Sea Level Controls on Submarine Fan and Slope-Apron Turbidite Systems 57
rrik A. V. Stow, David G. Howell, C. Hans Nelson

DDERN

*tive Margin Setting**

e Astoria Fan: An Elongate Type Fan 65
Hans Nelson

CONTENTS—VOLUME 3 (continued)

The Crati Submarine Fan, Ionian Sea 71
Franco Ricci Lucchi, Albina Colella, Gianni Gabbianelli, Sergio Rossi, William R. Normark

Delgada Fan: Preliminary Interpretation of Channel Development 79
William R. Normark, Christina E. Gutmacher

Morphologic, Acoustic and Sedimentologic Characteristics of the Magdalena Fan 85
V. Kolla, R. T. Buffler

Monterey Fan: Growth Pattern Control by Basin Morphology and Changing Sea Levels 93
William R. Normark, C. E. Gutmacher, T. E. Chase, Pat Wilde

Navy Fan, California Borderland: Growth Pattern and Depositional Processes 101
William R. Normark, David J. W. Piper

*Passive Margin Setting**

Morphology, Sedimentation Processes and Growth Pattern of the Amazon Deep-Sea Fan 109
John E. Damuth, Roger D. Flood

The Bengal Submarine Fan, Northeastern Indian Ocean 119
F. J. Emmel, J. R. Curray

The Ebro Deep-Sea Fan System 125
C. Hans Nelson, Andrés Maldonado, Francis Coumes, Henri Got, Andre Monaco

Morpho-Acoustic and Sedimentologic Characteristics of the Indus Fan 133
V. Kolla, Francis Coumes

The Laurentian Fan: Sohm Abyssal Plain 141
David J. W. Piper, Dorrik A. V. Stow, William R. Normark

Mississippi Fan: Internal Structure and Depositional Processes 147
Arnold H. Bouma, Charles E. Stelting, James M. Coleman

Rhone Deep Sea Fan: A Review 155
William R. Normark, Neal E. Barnes, Francis Coumes

ANCIENT

*Active Margin Setting**

Miocene Blanca Fan, Northern Channel Islands, California: Small fans reflecting tectonism and volcanism 161
Hugh McLean and D. G. Howell

Submarine-Fan Facies Associations of the Eocene Butano Sandstone, Santa Cruz Mountains, California 167
Tor H. Nilsen

The Cengio Submarine Turbidite System of the Tertiary Piedmont Basin, Northwestern Italy 173
Carlo Cazzola, Emiliano Mutti, Bartolomeo Vigna

Trench-Fill Submarine-Fan Facies Associations of the Upper Cretaceous Chugach Terrane, Southern Alaska 179
Tor H. Nilsen

CONTENTS—VOLUME 3 (continued)

errelo Fan, California: Depositional System Influenced by Eustatic Sea Level Changes 187
. G. Howell, J. G. Vedder

ubmarine-Fan Facies Associations of the Upper Cretaceous and Paleocene Gottero Sandstone, Ligurian Apennines, aly 193
or H. Nilsen, Ernesto Abbate

he Hecho Eocene Submarine-Fan System, South-Central Pyrenees, Spain 199
miliano Mutti

he Deep-Sea Fan Deposits of the Miocene Marnoso-Arenacea Formation, Northern Apennines 203
ranco Ricci Lucchi

urbidite Facies in an Ancient Subduction Complex: Torlesse Terrane, New Zealand 211
C. MacKinnon, D. G. Howell

*assive Margin Setting**

pper Jurassic Overlapping-Fans Slope-Apron System: Brae Oilfield, North Sea 217
orrik A. V. Stow

ftermath of COMFAN: Comments, Not Solutions 223
illiam R. Normark, Neal E. Barnes

iagnostic Parameters for Comparing Modern Submarine Fans and Ancient Turbidite Systems ..... Map
eal E. Barnes, William R. Normark

Terrigenous Clastic Depositional Systems

Applications to Petroleum, Coal, and Uranium Exploration

W.E. Galloway, University of Texas at Austin, and **D.K. Hobday,** Bridge Oil Ltd., Sydney

Terrigenous Clastic Depositional Systems bridges the gap between process-related studies of sedimentary rocks and the more traditional economic geology of commercial mineral deposits. It is unique in its focus on applied three-dimensional sub-surface analysis of sedimentary basins and their associated mineral fuel deposits.

1983/423 pp/cloth $39.00/0-387-90827-7

Pyroclastic Rocks

R.V. Fisher, University of California, Santa Barbara, and **H.-U. Schmincke,** Universität-Bochum

This first modern comprehensive treatment of pyroclastic rocks discusses general processes of formation, emphasizing recent, well-studied volcanic eruptions, as well as pyroclastic rocks formed throughout earth history. It provides an authoritative account of pyroclastic processes, particles, and rocks, integrating information from volcanology, sedimentology, and igneous petrology.

1984/528 pp/345 illus./cloth $49.50/0-387-12756-9

Metal Deposits in Relation to Plate Tectonics

F.J. Sawkins, University of Minnesota, Minneapolis

This book relates the geology and genesis of metal deposits to their specific plate tectonic environments. The structure and lithology of various environments are described, and detailed examples from many deposit types are given. The author includes suggestions for exploration strategy.

1984/approx. 250 pp/cloth $38.00/0-387-12752-6
(Minerals and Rocks, Vol. 17)

Geochemistry of Sedimentary Ore Deposits

J.B. Maynard, University of Cincinnati, Ohio

This authoritative work provides the background essential for understanding sedimentary processes in ore genesis. It integrates geochemistry, petrography, and sedimentology to characterize the occurrence and origin of sedimentary ore deposits. Each type of ore is placed in its sedimentologic context, and the chemical processes involved in its formation are thoroughly discussed.

1983/305 pp/149 illus./cloth $29.80/0-387-90783-1

Microfacies Analysis of Limestones

E. Flügel, University of Erlangen-Nürnberg

For researchers and exploration geologists who need rapid and intensive training in modern methods of microfacies analysis, this volume describes the state of contemporary research in an increasingly important area of geoscience. **Microfacies Analysis of Limestones** stresses practical applications and integrated facies research.

1982/633 pp/78 illus/cloth $68.00/0-387-11269-3

Advances in Physical Geochemistry

Editor-in-Chief: **S.K. Saxena,** Brooklyn College, City University of New York

The annual volumes of this series review the latest findings and theory on the kinetics and thermodynamics of minerals, melts, and fluids, and their application to the petrogenesis of planetary rocks. Fields covered include geochemistry, geophysics, petrology (including meteorites and terrestrial planets), and mineralogy. Volume 3, **Kinetics and Equilibrium in Mineral Reactions,** is now available.
